1. A new Sovrom chemical works is under construction in Rumania. Although its ostensible function will be the manufacture of nitrogen and fertilizers, it is in fact intended to be the largest and best equipped explosives factory in this country.
2. The factory is located in a forest near Ucea, off the main Sibiu-Fagaras road.* The entire area is surrounded by barbed wire and is heavily guarded.

Comment: It appears from examination of a map of the area that the location of this factory is approximately 45°43' N by 24°42' E, not far from the village of Ucea de Sus.
